

Light Table 1.1 Available Today for iPhone and iPod touch on Apple's iTunes App Store

GOTHENBURG--December 1, 2008--Lingon i Korg Software Creations today announced that the next version of their Light Table iPhone application, version 1.1, is now available on the iTunes App Store.

The major **new features** are:

1. Ability to add Text Labels, and manipulate them just as you would regular images.
2. Upload and post your final image collage to Twitter, via the TwitPic web service.

Light Table is a both useful and fun tool for photographers and anyone else loving to work with collages of images. Import a bunch from your Photo Library, drag around and rotate them until they fit perfectly together. Then save the Light Table to your Photo Library, or upload and post to Twitter.

Pricing & Availability: Light Table 1.1 is available worldwide as of today on Apple's iTunes App Store, for the price of \$2.99 USD. (Local currencies vary.) Note: The price will go up progressively as we add more features in the future. Updates to this major version are free as usual.

Additional applications developed by Lingon i Korg and available on the App Store are: Rulla ("Get your message across"), DownTime ("Pretty huge timer"), Meditation Timer ("Time your tranquility") and Clockulous ("Watch your time").

Lingon i Korg Software Creations was founded in Sweden in 2008, with the mission of designing and producing handy software applications for Apple's mobile platforms, including iPhone and iPod touch, as well as provide Cocoa, Cocoa Touch and related consulting services. Lingon i Korg currently has five apps released on the iTunes App Store, with a handful of new, wholly owned, as well as contract-developed applications, under development to be released in the coming weeks and months. Trivia: "Lingon i Korg" is Swedish for "lingon in a basket."

Light Table Available Today for iPhone and iPod touch on Apple's iTunes App Store

GOTHENBURG--October 24, 2008--Lingon i Korg Software Creations today announced that the company's fifth application for the iPhone and iPod touch mobile platforms is now available on Apple's iTunes App Store.

Are you collageous?

Light Table is a both useful and fun tool for photographers and anyone else loving to work with collages of images. Import a bunch from your Photo Library, drag around and rotate them until they fit perfectly together. Then save a quick screenshot of the compilation before rearranging everything to try out your next creative idea.

"This is another one of those apps we really built for ourselves to boot," said Oskar Lissheim-Boethius, the founder of Lingon i Korg Software Creations. "As both photographers and designers, with a healthy love for the art of collages, we just couldn't pass up the opportunity to do something special with the iPhone's revolutionary multi-touch interface. Manipulating photos in Light Table by pinching, rotating, zooming in and out, is nothing less groundbreaking than an entirely new *kind* of experience."

"We believe many professionals will find Light Table to be a joy to use in their daily work lives. Creating design presentations, sorting out that latest photo shoot, or drafting the next real-estate catalog, all while on the go and preparing for (or why not actually in) the next team or client meeting, is yet another brand new kind of experience."

Pricing & Availability: Light Table is available worldwide as of today on Apple's iTunes App Store, for the price of \$0.99 USD. (Local currencies vary.) Note: The price will go up progressively as we add more features in the

future. Updates to this major version are free as usual.
